

Patient Assessment of Care for Chronic Conditions +

Staying healthy can be difficult when you have a chronic illness. We would like to learn about the type of help with your condition you get from your health care team. This might include your regular doctor, his or her nurse, or physician's assistant who treats your diabetes. Your answers will be kept confidential and will not be shared with anyone else.

Think about the health care you've received for your diabetes over the past 6 months. (If it's been more than 6 months since you've seen your doctor or nurse, think about your most recent visit.)
